I have advice for you Weesheep... Now read carefully... I'm looking for you, and I'm gonna get a Ramjet right into either Havoc's Balls or Sakura's tits... If not, one right the centre of a 500 Sniper... You've been warned... Avoid me bitch :rolleyes: lol...

Anyway I don't know about the update but if I were you I'd get rid of it and just stick to normal RenGuard...

Oh yeah and click here, this should solve your problem!
