Subject: Which is better?
Posted by Dante on Thu, 15 Apr 2004 05:56:04 GMT

Windows XP, installed 18+ months (lost track...)
Max Uptime (37 days) power goes out a lot at work... thank god for my ups shutting down cpu after 20 minutes...

Crashes: only when my cpu burnt out, replaced it & the mobo without reinstalling (yes, that is possible...)

Dependability: awesome, runs fast, looks good, and i can get just about any kind of software to do just about anything for it, if not, any n00b can program it.
