I have found my problem. I opened Renegade with the button game2.exe and yesterday i tried it with the button game.exe. It work.

But...

Today I opened it and the programm has written this:

Trying to connect to server #1....Connected

Connected to server

Renguard is attempting to autoupdate itself.

But it takes too long time. Now i wait 30 minutes that it work or it has download the update. Whats the problem?
