[RoCTwix]The best way is to delete RenGuard is to go into your Renegade Folder then remove "game.exe" (Thats RenGuard) then rename "game2.exe" to "game.exe". That should work, i didn't have to reinstall

That's not really the BEST way... it'll work, but it will leave several registry entries as well as the uninstall information on your machine. Also, if you do it that way, then you use the uninstall from add/remove programs, it will remove the original game.exe and you'll need to reinstall renegade.

If you need to uninstall RenGuard, I'd recommend just doing it from add/remove programs.
