Can one person consive the understanding of pure intellectual Thought.
NO-- But ack Has the Exact idea of our Future, 20 years ago would You??? have concived that we would have progressed as far as we have??? I think not But Gene Rodenbarrie had the vision of what might come!! we as ppl where not "are" not ready for how fast we have come. the computer age I mean, our Technology is Growing faster then our Maturing is. What comes after the nano age. I say our own Distruction or the simplisity of what star trek Represents Realisim. and hope Star Trek Depicts our own Dreams, Anger, Hope, Vision, or Downfall. Thats how i see Star Trek What we are and what we as Men/Woman will Become.
ALSO it is a darn good show with outside injoyment
