I have an ethernet modem and thats my acces to go an the internet and renegade if i start rengurad if said there is an error

Send geport don't send it can i then choose, other pc acces to internet with this laptop, an school i can't because it have an proxyserver

I have tryed an my mothers internet USB Modem and that works and tryed with network my interter acces is with my mothers pc and that worked also

Why can i then not with an ethernet modem ?

And how do i change the port settings of my netwerk so i can play with an ethernet modem
