Yeah. I said that over at the RA forums. Not here, which is where you've seemingly based your arguments from.

There is nothing wrong with the texture itself. If it were a new SAM Site, it fits fine. Since we wanted to go for an older looking version, I asked Darkblade to upgrade what I did for me.

I don't have a mullet, dumbass. You don't even know what the fuck a mullet really is. It's two things, a type of fish commonly found in the Gulf of Mexico, and an 80s style haircut, requiring a long length in the back (below the shoulder) with a spiked short front.

Sort of like Joe Dirt, except worse looking.

Mine is long around all sides.

Which, again, has nothing to do with any of this.
