Before I installed beta 4 for Sole survivor, (im a beta tester) renguard was working fine, after I installed beta 4 and its patch and renguard vs 1.02 (in that order) I decided to play normal renegade, but then renguard put up 3 files from my ss beta and said "UNAUTHORIZED FILES DETECTED, EXITING RENGUARD NETWORK" Great, just great, I do not wish to uninstall the beta, nor do I wish to uninstall renguard, but I thought you knew what somerhino was putting in the mod.
