On that note, I've seen people in 20 v 20 games say they're getting 70 FPS. Seems a big far fetched, even for a 9800. Well maybe not.

(Thanks, oldtnt, did you manage to find the problem with not being able to save? If you can't find it out in a few hours, I'll just use the "copy to folder" option and hope it's the same.)
