I beleive this would go in the Mod Forum :S

I am trying to install and use Blazeregulator.

I extracted Rencore and FDStalk.dll's, and the VB's. Know when I try to open up BR I get the error MSWINSCK.OCX or one of its dependicies not correctly registered: a file is missing or invalid.

I do not know what to do, if anyone can help me, Im on all three messengers.
