MrSpeedI felt the same way about leaving it on the server and I will continue to leave it on. Like I said I personally have not had one problem with it except it tells me I cant play on pure servers and have skins loaded ( I dont) but I can play when I click Renegade. One more question.. it keeps telling me they need Renguard but not once has it said they needed to unload the skins and get kicked. everyone says "you need Renguard to play on this server" What if its not a pure server will skins be allowed? NAd how the heck tdo I tell if my server is pure or not? (I must be a n00b to ask suck a question)

A pure server needs renguard too, obviously.

It says "[player] is being kicked by RenGuard for: Skins are not allowed on this Server" - or something like that. Additionally, it displays the same message in the client window, so the user actually knows whats going on. He cant miss that message!
