Mammoth tank should be able to do all the things mentioned in Ack's post, but I disagree with speeding up rate of fire. The steady bam bam bam fits the Mammoth profile of strong, steady juggernaut. An armor upgrade at the very least I would say, if we can agree on nothing else.

That, and the missiles should be able to self-track on aircraft just like in the game.

Maybe even just allowing it to fire the missiles AND the cannon at the same time would be enough.
