From your IRC channel you can type

```
!set renguard off
```

Also make sure in the renguard.cfg that you have settings like these

```
# renguard config file
```

```
# Pure Mode - Disallows any clients with model textures (skins) and alternative weapon models. 1  
= enable, 0 = disable.
```

```
Pure_Mode = 0
```

```
# Server Motd ID - your motd id, as assigned on the Server Motd Configuration on renguard.com  
(numeric)
```

```
# 0 if you do not have a motd.
```

```
motd = 0
```

```
# how to notify non renguard users. available options: msg , page, off
```

```
# page is WOL only. if you disable it, it will only do the kick message.
```

```
# be sure to put it into your motd then
```

```
notify = msg
```

For BlazeRegulator go to <http://www.blazeregulator.com>

DragonServ will never be available for public use and making your own bot is no simple task. It requires a good knowledge of programming.
