Renegade =CPU whore.

Run this with a xp 2500,ore p4 2,5

run this with amd 1000 ore p3 1000

A radeon 9500 on both tests

Ule see the xp 25,and p4 2.5 getting 30-60 AVG in the game

and the p3/amd100 getting 5-15 AVG

btw this counts for a server (50) players.

When u play a map with only ureself in it.

Ule get with both cpu's 60 fps. The more people come the lower the fps, afcourse everybody knows that .
