Yeah, not only mIRC scripts but also useful utilities that people have made, and where they can get support.

These are the ones that strike my attention...

- RenGuard
- BlazeRegulator (or a choice from the variety of admin tools)
- BlazeRotate
- TeamSpeak Renegade (when it's eventually made)
- WOLspy (by DJlaptop)
- RenStat (by DJlaptop)
- FDSWeb admin (by DJlaptop)
- Renegade IP
- RenBuddyList
- RenAutoComplete
- RenSkirmish
- C-130 Drop File Editors

- XCC Mixer
- Renegade Mod Tools
- Mapping Tutorials

... and more that i can't think of right now.

I believe the thread should be locked to administrators only, so it can stay a tidy updated collection of all the helpful tools available to the community.
