Yeah, RenAlert maps suck, Ive said this in RenAlert before. They said "You must like b2b"

"Well thats why you mine you base assclown!"

RenAlert should have all the vehicle cover normal renegade has I hate having to go up against a phase transport with a fucking AK!!! And to properly kill a vehicle you have to have expensive char, like I took out one of those missile things with shock trooper, then I lagged and I got shot to death by a mechanic
