Majiin Vegetawould like to see how this makes you flicker for the non host

Yeah same for me.
If this dodging is in some way much like lagging around the corner of a rock shooting someone, then it should be disallowed for example.

But if this dodging is like in UT2K4's dodging, just a little fast jump sideways then maybe it should be allowed.
But the fact that not everybody has it makes it questionable.
As dodging if used properly offers an high adventage over players who dont use/ dont know how to use it.
