Madtone

Not sure where the stolen technology bit comes into it?

Overall, not bad looking but could use more "stuff" in it!

Constructive criticism....? Here? At Renegade Public Forums??

I think I need to lie down!

thanks for your comments, consider it taken on board.

As to the stolen tech bit, it has no base defences, flying structures (ramped) and several routes into each base.

Consider what unit GDI feels the lack of most in this situation, and you'll be about there.
