If I had to recomend a host, it would be wired-hub. No, they are not owned by me, or even operated by me. I had CNC Zone up with them for a long time. They are very reliable, and will help you out with whatever you need. Their support seems to always be there when you need them. The longest I ever had to wait was, I think, 1 hour (and that was because I put the support ticket at a low priority)

http://www.wiredhub.net/

Also, as England said check webhosting talk. But just remember, in most cases you get what you pay for.
