http://titan.renstation.net/maps/gmaxmps.zip

I released these due to not having the Time to Map anymore...I withheld Tib cave 2...its almost done and I will finish it myself(when i get the time),Im not done with mapping but most likely wont have the time to ever finish these...Visit Renstation.net/Titan for all of my Released maps.

I plan on helping out Reborn with a few maps of mine and possibly a few new ones.

You may modify any of these files as you wish....If you Release any of these maps just give me (Titan1x77) credit.

All of the maps are un-finished (some of them are very old)....There are some dummy buildings in the maps Created by Deafwasp.

Some maps have Textures other's don't.

Have fun...hope to play some of these some day.

If you have any questions on what I had planned out on any of the maps just send an email to Titan1x77@hotmail.com
