PLANNED FEATURES (Either planned to be done by release, or next major update)
----
1. Server MOTDs
   Server owner can design their own mini HTML page that is displayed to
   players when they connect. This page can contain anything from server
   news to logos and URLS.

2. Client localization
   RenGuard client buttons and controls displayed in the same chosen default
   language as the MOTD.

3. Map Notifications and Autodownloads
   RenGuard will warn you that the server you are connecting to has maps in
   its rotation that you do not have installed. Options to automatically
   download and install missing maps may be added.

4. Security enhancements. Although Renguard is very complex and secure from
   most tampering methods, we allready have more improvements planned. We
   could delay the release until RenGuard is "perfect", but the current
   protection should stop most if not all current cheating...we want it to
   stay that way and will keep updating the client as necessary.
