dudes, sbh i buy just becuse its a 400\$ laser weapon, its efective against infanry and tanks, if ure good u can take down several infanry bfore succumbing ureself

i dont reely use the stealth though, unless i feel like deboing a trnak or c4ing an mrl or med

i reccomend u get 50 more bux and buy a laser chaingun, which is better than a patch against infanry and smokes tanx
