Did you installed them properly?

http://dynamic6.gamespy.com/~renalert/index.php?page=downloads_patches

First you download 991, then 9915, then 992 and finally 9925.

By the way, they have a forum you know:

<http://dynamic6.gamespy.com/~renalert/forum/>

By the way, when patches get installed the installation might get slow or even stop, don't worry about that... Just don't close the installation window.
