When you upgrade RenGuard, your firewall needs to be told again that RenGuard is safe to access the internet.

As for the other error:

<http://www.renguard.com/faq.php>

I'm getting the message: "CRC Mismatch Error"

This error message means that game.exe and game2.exe are the same file. This may happen if you try to install with the installer and the safe installer. You may need to reinstall Renegade to replace the now-missing game.exe.
