This is gonna sound stupid, and it is, but what kind of issues am I going to have on a modem connection at 53333 bps?

I thought I was going to be able to make it till fall, when I can get my cable modem back but I'm jonesin' bad.

I know to stay off of enormous servers like FastCONN 1 & 2 and their 50 player matches, but I deadly serious when I ask IS IT POSSIBLE?
