NeoXALL I CAN SAY IS WOW! Good job your mod is much better then Ren Alert now!

HA... That so-called "mod" was just restarted by Renardin only a month or 2 ago, they're literally a year to a year and a half in production/quality behind Renegade Alert. Plus, they only have a couple things that look good, most of them still use the old, crappy models.

Lol, the only reason for you to post that was to start a flame war. In that twisted, little mind of yours Reborn might be better, but here in the real world, it's not even close. (Reborn is alright now, and is getting a lot better, but it's still got a long time to fix the mess that gay fairy left behind (tell me, if he ruined the mod in the first place, why did you let him back on?) to be cosidered "good".)
