Where was your outrage when BC tried stealing the RenGuard source code, or when they decided that it'd be fun to try and call Cisco to "fuck up Crimson and Blazer's life and get them fired?"

This is nothing compared to what they've done in the past to people here, and it's about time someone slapped the little bitches in the face. It may have been wrong, but that doesn't change the fact that they needed a wake up call.

If it had been me acting the way they did, I know all of you wouldn't have hesitated to say "go xptek get him!" Of course since it wasn't me being an asshole towards everyone and everything, trying to destroy lives and happiness, it's okay for BC to do it... But if someone does anything about it, they're wrong, and all of n00bstories is to blame.

Whatever. :rolleyes:
