Well might as well start searching now. Yes like most mods we are in search of a coder. He/She should be able to script our intended game modes and other mod features to create a more organised type of duelling/draw system.

To sway your better judgement we are a close nit team who intend to finish a mod with quality and utmost functionality. We are not about having a team of 10+ where each member does one thing and departs.

If you are interested please email me at neoxmatrix@hotmail.com.
