Explosion! The BOOM of the game! I do not know if it has animation or not, but like when a building hits the yellow section, you see explosions, that's what I'm talking about. I do not know about smoke either. I guess you may say something like the RA nuke animation, how would somebody make something like that? (I do not want to make the RA animation, I am just using that as an example for what I'm talking about)
