In the next version of renguard, I'd like to see the following implemented:

/ Renguard able to print you money.

/ Renguard fixing your computer and deleting all viruses and adware on it.

/ Renguard upgrading whatever processor you have by 1 Ghz.

/ Renguard working with all games.

/ Renguard that you can use outside of home to protect you from real life cheaters. I'd hate to go down to the shops for some food and be gunned down by a n00b with a laser rifle shooting 1000 rounds a second at pedestrians.
