make sure you've set your lan ip's in the safe zone:

so add the (in my case) 192.168.1.1-192.168.1.15 to the safe zone,

als make sure your internet security level is set to medium, this must solve most problems.

The high ping can also be caused by a slow upload. Make sure you have plenty of bandwith to host. Further is a good configuration of your router/modem a must. Open only the most important ports and try to avoid dmz host.

greetz, Pavla
