O.K, look at it this way: You play on multiplayer, and you sometimes see a vehicle that looks like it is teleporting, instead of moving straight.

This is not a cheat, but it happens sometimes. When it happens to you, your character can still use its weapon when you are inside vehicle and in some vehicles, it will change from thirdperson view to first person view. This also makes it look like the vehicle is lagging.

The point is: The most logical course of action is to exit the vehicle, and enter it again, so that it works normally. But, some people don't do that, and it is really annoying when you see this. So I am asking: Why some people don't exit the vehicle? Are they so stupid that they don't care about this? Does it give you any advantage?

If you don't know what the hell am I talking about then nevermind. I don't really know how to explain this.
