MrSpeedHe plays on Renguard servers does that help you with proof?  
People blame people for cheating mostly (now with RG out) because they are simply getting "owned". I played a lot before RG and could average about 40-50 kills in almost every game and get about 3 accusations from people everytime I played (which took the fun out of Renegade ). I stopped playing because I was playing FarCry, but then came back to see that RG servers are full and Renegade got its "fun" back (now less accusations from n00bs ). I sucked when I first came back, but now I got most of my skill back. On RG servers, I can still do better than the average sniper and get headshots again.

I do not know who believes RG works or not, but people like me have nothing to hide. If we aren't cheating, most likely we're not. You can tell by their responses to know if someone's cheating, plain and simple.

I hope that made any since, I think I zoned out at "People blame people..." Lol.

PS: Did you read all of this? (kudos)

[EDITED]

CrimsonPeople try to say that RenGuard isn't 100% effective... well, NOT running RenGuard is 0% effective, so if I have the choice, I'll take 99% over 0% any day. Besides the fact that we fix exploits when we hear about them.

Another great point made by the great Crimmy!
