You realize that almost no one in that party knows what side of various issues, and the ones that do don't dare speak about them because they would be seen for the communist(insert-radical-anti-human-political bent here) that they are.

On topic, Fire Ants are bad. Best thing to do is pour a gallon of diesel fuel in the hill and let it soak for a couple of hours, then burn the bastards. Gas won't do it because it evaporates too quickly. There are also various poisons available, Amdro being the best. If it's really bad(a dozen hills or more) call an exterminator as you're in over your head with a super-colony.
