Heh, everyone please take note of a00000sfv (or close to). We have joined the list of idiots to do this, pretty soon we will see a00000000, then a00000001. At some point it must end because this is getting retarded. But, my server just went to 20 players so I want to see it full, like everyone else, so join the crew, right?
