I LOVE RENGAURD an Thanks to all the crew and team who made it posiable -

with that out the way - here is my little problem - when startin up RenGaurd -i join a server - i get the message of rengaurd bein there or not - no biggie - then i move to another server - if rengaurd is runnin there - i get a message that i need rengaurd to game there - (hmmm,) ok , then i usualy get a message i will be kicked for not havein rengaurd (hmmm, NO WAIT I GOT RENGAURD RUNNIN) - and of course i am booted - then i have to shut down renegade an rengaurd - restart an go back to the server i was just at an i can game now -

i am sure i aint the only one who has this issue - is it being looked into , GOD i hope so -

other than that i love rengaurd -

oh yea when are u guys gonna start goin thru the w3d files we sent ya so they can be allowed in the game - i kinda miss my spam flame thrower
