bullshit, you pm me asking me saying Black-Cell is hacking your servers, you didn't even know what they were using. YOU asked me what they were using, I said I don't know nor do I know anything about your servers. Then you asked me where to get the tools to crash servers, I told you HELL NO and you left.

I have the tools to crash servers. :rolleyes: I actually asked you if you had problems with black-cell and you told me no. I never asked you for any tools.

1 you admit, you edit MIRC logs and took a screenshot where you covered your tracks after you said cdkey check was bases solely on always.dat and the no-cd check exe was the same as the one w/cd-key check

No, I don't "admit" I ever did.

-2 you bashed reborn yet you joined my server TO PLAY THE GAME! NOT TO TEST IT FOR BUGS

I joined to see if it was possible to edit harvester waypoints from the client.

-3 You can't design shit, you didn't do anything on liquid2d.com, you have no skillz

Ask Aprime. :rolleyes: I've only done a ton of work for Vio.
