oblivion165Use kazza, get excel, which you shouldnt have to have to ecprt it.

if you cant handle this i suggest going back to other simpler things, like monopoly board games, your mods will be at your level there

No, you guys aren't really helping me that's my problem. I ask a simple question, and I give the errors I encounter when I try to follow the advice you guys give. Yet you aren't helping me with the errors nor the thing I'm asking for.
