Predictable as ever. I know how this argument will go.

1. Spelling errors will be noted.
2. Discussion of logic, and how mine is inerrantly flawed, and yours is infallible.
3. Then we will spend 10 pages flaming about Renalert's superiority, and any one else's attempts at modding are worthless because they don't meet WW "standards"
4. Then once we start to make some headway, you will explain about WW giving only you the maps, and how your superior intellect "fixed" thier mistakes
5. Then the discussion will degenerate into a nice little flame war with the 10,000 anti and pro ACK forces and all on-topic and logical thinking will be squashed under the oppressive heal of stupidity.

Enjoy.

That being said, Nice mod Ren, but you need to finish it this century.
