Blazerno matter how much money was involved

Clearly if an extremely wealthy entity wanted to they could simply buy EA (it's a publicly traded company). At that point they would own all of EA's intellectual property.

Additionally at a more sensible level its only money, businesses exist to make money, if EA thought it was in their interests to sell the source for Renegade (i.e. they got a big enough check) they would.

Additionally what legal issues are you talking about, the only cases I can think of is if they purchased rights from a third party or worse stole code from someone.

In either case enough money would solve both problems (read: payoff).
