AIM > Yahoo Messenger

Both of those > Trillian <http://www.ceruleanstudios.com>

EDIT: Grammatical Errors

EDIT #2: Yahoo blows big-time.

EDIT #3: Ok, I just read the article, and yahoo blows even bigger than before. Their spamming claim is such B.S. All Trillian does is let you access Yahoo through a different skin, basically. You still have to play by all the same rules. They just want everyone to have to download Yahoo Instant Suckenger so they can send you all kinds of advertisement crap and load a whole ton a sh*t on to your computer, which doesn't happen when you don't download the Yahoo program but instead link to their services with Trillian.
