Subject: The Pitts allows cheaters on their server?

I'm not trying to get involved (haven't been playing quite recently, so this is new to me) but I have a biting question: Renguard seemed to be working fine shortly after June 1st, or whenever it was. I remember witnessing on the Pitts a full server with Renguard running for many times, and then Renguard stopped being run on the Pitts. That's all I know--what caused the instability to start?
