louisas part of the agreement we made, xptek should be banned from these forums. and you know just as well as i do that the two are the same in everything but what label you want to use.

Far as I'm concerned that "agreement" means jack shit since I'm tempted to ban all traces of BC from IRC and wherever else n00bstories has you, simply because you took it upon yourselves to make a "treaty" without everyone present.
