majikentIf it were meant to be driven on, they would have made it a size where that was obvious. Oh my god. You mean to tell me that the reason it is only wide enough for infantry is because... gasp... it's for INFANTRY!?!?!?

I tend to agree with this. If Renegade had more realistic physics, only the Recon Bike would be narrow enough drive up the ramp. A Medium Tank wouldn't be able to get over the barrier with one track, or a Buggy with one wheel, because in real life gravity would tip the vehicles over. They wouldn't be able to balance on a ledge perfectly with only a small area of the vehicle actually touching it.
