And you are neither WS, or anything to do with it, thus your 'status' is completely invalid, and you should NOT be claiming to represent thier ideology for this game.

And yes, it is a masterpiece. It captured the imagination of all C&C players who loved this game since 1995. It captured the spirit of the genre, and expanded on it to create a game experience many of us will never be able to replace, RenAlert included.

Delphi was around, because Cliff Hicks wasn't, if you remember correctly. Yes, he was busy with Generals. So? He asked this community if Glacier was something we wanted to see incorporated into the last patch. He also asked us some other questions regarding what we wanted to see in the next C&C game, and some other questions about what we liked / didn't like about this game. Seeing as I can't exactly do a database search of the old posts, I will leave it there. The background machinations of why Delphi asked don't really matter.

And if this whole community helped you get where you are, then why do you continue to keep harassing it, and anyone who still enjoys it? There aren't many of us left. Your mission will be complete soon.

It is NOT for you to decide what is a 'keeper' and what isn't for this community. It is up to us when we choose to download it or not.
