Ok

this is the story

I uninstalled renegade because I wanted to get rid of some skins and AI bots

So I uninstalled renegade and then I reinstalled it. Well I clicked the renegade icon on my desktop and Renguard pops up then I click connect and it says "The procedure entry point ?Detect Bandwidth @@YAAAAKHAHAHPAUBandtestSettingsStruct @@PAD>@Z could not be located in the dynamic link library Bandtest.dll."

Then I tried uninstalling Renguard from my control panel but it's not there in add or remove programs!

What do I do?
