This game is so fun I have been playing the demo for a while and I bought it today. games up to 150 people get chaotic but are very fun and force team work.

sorry I don't have any Vehicle SS but I was just figuring out the controls when I took these. I highly recommend it they are working on getting the game to run with up to 300 people. It runs very smoothly even with 56k but takes a some what highend computer.
