There is already another thread for this, why does everyone insist on posting their own thread about WOL being down?

EA isn't evil, they're just crap, I am surprised however that WOL hasn't been renamed to EA Online or C&C online. Still, I'm happy the names been kept; it means there still a piece of WS alive, no matter how small it is.

It probably hasn't been renamed due to the fact that no one at EA knows how to operate it. Alls they know how to do is trip over the cord, plug it back in, and press the power button.

yeh lol. can just imagine someone from ea tripping over the cable and not knowing how to put it back in. They really should hire someone who actually know how to run the servers, every time something goes wrong its instant shutdown analyze every single line of code put it back together and fuck it up again. The continuos circle of life for a ea technical 'expert'
