I have a few mods that only change things like the sonds of various weapons and the look of the machine gun and pistol. When i try to go online in renegade the renguard thinks these mods are cheats and shuts down the game. Is there anyway i can fix this?

yes i know what u mean, i had the same prob.
u have to delete the w3d files, or send a mail with the name of the mods to the programmer here, that he can access that in the next update
