When you update the renguard it comes up the way it should.
When you download from reguard the whole file it installs but when you go to start it, it come up and then disappears doesn't start at all.
this is on the new version

Renguard if update from 1.0 is fine. If you download 1.1 from Renguard.com it does not work. it will install but when you start it up
it disappear and does nothing. Has anyone been able to get on Westwood server today since updateing I haven't been able to log in!

My renegade doesnt crash, although renegade is down, but i still can start it, and im using winxp pro, but i dont use anything like cracks or the cd itself..
i use safedisk cleaners
if anyone needs it, just tell me and ill upload it, or put up my server

and by the way, this is almighty HALF3LIF3
